PROFESSIONAL SUMMARY:

Motivated and detail-oriented Software Engineer Fresher with a solid foundation in Java, Object-Oriented Programming, SQL, Data Structures & Algorithms, and full-stack web development. Demonstrated ability to build, deploy, and optimize real-world applications with measurable results. Quick learner with a growth mindset, passionate about writing clean, efficient code and solving complex problems in collaborative, agile environments. Seeking a Software Engineer / Java Developer role to apply technical skills and contribute to innovative product development.

TECHNICAL SKILLS

- **Programming Languages** :Java
- **Web Technologies** :HTML, CSS, JavaScript
- **Frontend Framework**: React.js
- **Backend Concepts** :REST APIs, SpringBoot
- **Database** :MySQL, SQL
- **Tools & Platforms** :Git, GitHub, VS Code
- **Core Concepts** :OOP, SDLC, Debugging, Basics Of Microservices

PROJECTS

SmartNote.IN – Academic Content Delivery Platform

- **Tech Stack**: HTML5, CSS3, JavaScript, Git & GitHub | **Role**: Full-Stack Developer
- Designed and deployed a responsive, performance-optimized web application for structured academic content delivery
- Optimized site navigation architecture, reducing content access from 3 clicks to 1 – improving user experience by 67%
- Identified and resolved cross-browser compatibility issues across Chrome, Firefox, and Safari
- Applied Git branching strategies and version control best practices throughout the development lifecycle
- Key Outcome: Production-deployed application with measurable performance improvements and positive user feedback

Smart Assistive Navigation System for Visually Impaired Persons

- **Tech Stack**: IoT, Microcontroller Programming, Ultrasonic Sensors, Embedded C | **Role**: System Developer
- Developed an IoT-based wearable device with real-time obstacle detection using ultrasonic sensors and vibration haptic feedback
- Programmed microcontroller logic for precise distance threshold detection and multi-level haptic alert triggering
- Integrated an automated email alert system for caregiver notification during emergency events
- Key Outcome: Fully functional assistive prototype demonstrating end-to-end system design, real-time processing, and quality validation

INTERNSHIPS & CERTIFICATIONS

Infosys Springboard – Programming using Java | 2026

- Gained hands-on experience in Core Java, OOP principles, exception handling, and collections framework
- Developed multiple mini-applications applying real-world Java programming patterns and debugging techniques

AICTE – Google Generative AI Virtual Internship 2024

- Explored foundations of Generative AI, large language models, and practical AI application development
- Worked on AI-powered problem-solving exercises and modern AI tool integration

EDUCATION

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering | 2022 – 2025

Eluru College of Engineering and Technology | CGPA:7.5

Diploma – Electronics & Communication Engineering | 2019 – 2022

Sir C.R. Reddy Polytechnic College | CGPA:7.4

STRENGTHS

- Problem-solving
- Quick learner
- Team collaboration
- Communication skills
